

ENVIRO-SAFE

REFRIGERANTS

ProSeal for Auto Directions for Use

As per use with any refrigerant product, take adequate precautions during use.

Before using this product, it is recommended to use Enviro-Safe ProDry in the system if moisture exists. **Do not inject product into system if compressor is not running.**

1. Shake can well.
2. Install can tap valve and charging hose.
3. Install charging hose on low pressure side.
4. Invert can.
5. Install all ProSeal from can.
6. Fill system to correct pressure.
7. DO NOT overcharge the A/C system.
8. Run the system for forty-five (45) minutes minimum to allow product to circulate in the system.
9. Open windows to keep the compressor running.

This can will treat up to a four pound (4 lb.) system.

Note: This product will repair most small leaks in evaporators, condensers and fittings. However, this product will not repair seals or o-rings.
