

ENVIRO-SAFE

REFRIGERANTS

Stop Leak for Auto

Directions for Use in MOST Cases

As per use with any refrigerant product, take adequate precautions during use.

Use with Mineral, Ester & Pag Oils Only!

1. Shake can well.
2. Install can tap valve and charging hose.
3. Install charging hose on low pressure side.
4. Invert can.
5. Install all product from can.
6. Fill system to manufacturer specification pressure.
7. Run compressor to circulate.
8. Discard empty can according to all rules and regulations for disposal in your area.

Note: If an air conditioning system charged with Enviro-Safe develops a leak, it is recommended to evacuate any refrigerant before adding any dye charge, oil charge or before installation of any refrigerant.
